

ARNOVA's Catalog of Current Research

51st ANNUAL ARNOVA CONFERENCE

Imagining ARNOVA's Next 50 Years: Scholarship, Practice, Community

Nov 17-19 | Raleigh, NC

The 2023 Catalog of Research includes authors and abstract summaries from ARNOVA's 51st Annual Conference; Imagining ARNOVA's Next 50 Years: Scholarship, Practice, Community

Each year ARNOVA gathers more than 600 of the best scholars, researchers and teachers interested in nonprofits, voluntary action, philanthropy, and civil society at its Conference. The panoply of presentations, from these scholars and students examining the realm of voluntary / nonprofit / nongovernmental /civil society organizations and action offers a wide-ranging vista – with some significant detail – of the most pressing subjects, topical emphases, and methodologies of the latest research in this field. This catalogue is presented for those interested in questions about and developments in philanthropy, fundraising, nonprofit management, voluntary action, social enterprise, and civil society, from the local to the international scale.

This catalog can be searched by key words, including author's names or paper titles, as well as by field or subject of interest. If you want to search this document, just hit 'Ctrl f', and a box in which you can enter search terms should appear in the upper right-hand corner of your screen.

The work referenced here belongs to and is best understood by the authors, so we leave it to you to contact the authors to request copies of their papers and seek conversations, as you wish. Authors' email addresses are found in parentheses next to each author's name and affiliation.

What we know is that dialogue among scholars and practice-leaders around these presentations of research is critical to building knowledge and improving practice. So, we hope publishing this will encourage those conversations and further collaboration; and we hope you find this a useful tool for your own work.
